

TRUCK DRIVING SIMULATOR · SRI LANKA

Full-Cabin Truck Simulator

A full-size truck cab on a six-degree-of-freedom motion platform, with a panoramic curved screen. Trainees feel braking, cornering, slopes and road surfaces as they would in a real truck.

Full-size cab

6-DOF motion

Panoramic screen

Built to order

Configured to your training program

Commercial and military

Cab colour and scenarios to suit

Installed and supported

On-site commissioning and 24/7 help desk

Heavy-vehicle training without the risk

Heavy-vehicle drivers need many hours of experience before they can handle a truck safely on public roads, and that experience is costly, slow and risky to gain on real vehicles.

The simulator puts trainees in a full-size cab where mistakes cost nothing and every session can be measured. It is built to order and configured to your training program, for commercial truck and bus drivers or military truck drivers.

Illustration: the instructor follows the trainee's drive and route from the instructor station.

KEY FEATURES

Feels like the real truck

Full-size truck cab

Real driving controls and a full cab, in a right-hand-drive layout.

6-DOF motion platform

Recreates braking, acceleration, cornering, slopes and road surfaces.

Panoramic curved screen

A wide, realistic view of the road around the cab.

Manual and automatic

Train drivers for manual and automatic heavy vehicles.

Scoring and replay

Instructor station, session scoring and replay for objective assessment.

Configured for you

Motion range, screen size, cab colour and training scenarios are customizable.

TWO WAYS TO TRAIN

COMMERCIAL TRUCK TRAINER

For truck and bus fleets

Transport, logistics and construction companies can prepare drivers before they take real vehicles on the road, for new hires and refresher training.

MILITARY TRUCK TRAINER

For armed forces and police

Train drivers on military truck operation without wear on operational vehicles, in any weather, day or night, with a military green cab and military scenarios.

Configured for your training program

Specification	Full-Cabin Truck Simulator
Cab	Full-size truck cab, right-hand drive
Motion platform	6 degrees of freedom (pitch, roll, yaw, heave, surge, sway)
Visual system	Panoramic curved screen
Transmission modes	Manual and automatic
Software	Truck and vehicle models, left-side traffic, instructor station, scoring and replay
Power supply	Three-phase
Cab colour	Customizable, including military green
Motion ranges, screen size, dimensions	Configured to your requirements; available on request
Warranty	Terms confirmed with each order

FOR TENDERS AND PROPOSALS

Detailed technical specifications, including motion ranges, visual system, dimensions and site power requirements, are available on request. We can prepare a formal specification and quotation for your tender.

HOW WE WORK

01

Consultation

Tell us about your drivers, vehicles and training goals.

02

Specification and proposal

A formal specification and quotation, ready for tenders.

03

Installation

Installed and commissioned on site by qualified staff.

04

Training and support

Instructor training and a 24/7 online help desk.

Images are illustrations – final design may vary. Specifications are configured for each order.

Installed, commissioned and supported

IDEAL FOR

Armed forces and police

Transport companies

Logistics and delivery

Construction companies

Bus operators

Fleet operators

Installation and commissioning

Every simulator is installed and commissioned on site by qualified technical staff.

24/7 online help desk

Technical help whenever you need it, backed by local and expatriate technicians.

Technicians within 24–48 hours

If an issue can't be solved remotely, we send a service technician within 24–48 hours.

Pre-order now

Built to order. Ask for a formal specification and quotation.
